

GUARDIAN GATED FENCEING SYSTEM

AREA DIVIDER - DIVIDING FENCE - PLAYPEN - MULTI SHAPED AREA ISOLATOR TO SURROUND OR ISOLATE DANGEROUS AREAS. ADJUSTABLE LENGTH & SHAPE.

An adjustable length 75cm. high dividing fence made up of easy to connect 60cm. long panels. 1 panel incorporates a 44cm. wide child safety gate. Panels may be quickly added to or taken away from the fence to make up the required length or to adjust the length of the fence to suit various locations. Panels may be joined together at any of a multiple of angles to make the overall length of the fence any shape. By joining together each end of the fence a circle, square or any other shape of enclosed area can be created to either use as a play area or to enclose or isolate dangerous objects or areas. Rooms or parts of rooms may be divided off from the rest of the room. By attaching the set of easy release wall fittings a location may be set up so as to run the fence from wall to wall in various shapes. The easy release wall fittings not only lock the fence to the wall, they also allow a multiple of angles at which the fence may start out from the wall. All joining & release fittings are designed to be very difficult for children to attempt to manipulate. The Sentry fence is not designed to be left outdoors in the weather.

ONE UNIT OF 6 PANELS being 5 fence panels & 1 gate panel_ is 3.66m (11' 10") long. If longer length needed add 60cm. panels as required.
